2) Company Profile

Registered in shanghai Pudong Software Park, Shanghai Jietu Soft Co., Ltd. is a company well known as the world leading company in 3D panorama & virtual tour industry. We focuses on image based virtual reality system and successfully developed China first 3D panorama stitching software – 'ZaoJingShi', and the world first professional 3D virtual tour software– 'ManYouDaShi'. This serial software has become the most preferred software of many multi-media design company, web building company, real estate Company, education and research organization, public security and military unit for producing panoramas in their area. The customers are all over the world.

Meanwhile, the company keeps developing its advantage and invented the world leading equipment in capturing massive 3D panoramas quickly and related technique. And then the company captures the data from many cities and put them together onto the self-made city real scene application service platform – city8.com. The website city8.com provides free search of real scene map and useful business information recommendation. It's greatly helpful and useful for people's daily life and grows rapidly. Up to now it has covered more than 30 cities and got over 100,000 unique visitors per day. Besides, the panoramas of city8.com are also used by the city portal website of many cities, such as Beijing, Shanghai, etc.

Besides, Jietu Soft also did lots of big project with its mature massive 3D panorama capturing system and related technology, which covered city planning and survey, project management report, digital city, digital campus, digital exhibition, real estate show, public

security, criminal investigation, fire protection area, etc.

2. Services Provided to the Expo Participants

For Expo participants, we could provide our 3D panoramic exhibition system, related technology and services. So the exhibitors could have a new way to 360°display their countries, regions and cities' landscape, scenery, culture, economic development progress, etc. And this display is based on the virtual tours built by our real scene 3D virtual tour technology. With interactive display equipments, users could have the feeling of walking around the real scene and experience the participants unique characteristics. This platform could also be visited through internet. Thus, the visitor could using this platform at home through their own PC and do not have to be on the scene.
